Dear Valued Customer,

RE: Imaging of Shipping Documents

The Provision set forth in the Federal Regulation, 49 CFR Part 379.7, supports the use of Image Technology as a means of permanent record storage.

After careful review of the Federal Rule of Evidence, in section 803 (6) which provides, in pertinent part, standards to measure the legitimacy of original images we determined there was value in: "the submission of documents {which are} validated by 'the testimony if the custodian or by the other qualified witness, unless the source of information or method or circumstance of preparation indicates lack of trustworthiness'.

Under these Regulations, Tennessee Steel Haulers, Inc. maintains the right to destroy the original paperwork as a normal course of business after it has been scanned into the Image System and to **submit the Imaged Document to any party requesting original paperwork**. Electronic images of documents will now legally replace the paper as the original copy. The imaged document is certified to be a true and correct copy of the original bill of lading.

Please forward your payment in a timely manner. Thank you for your cooperation in this matter.

Penny Keller
Credit & Collection Manager
